

Workshare

The high stakes documents company

When you need to compare, secure or share documents, you need Workshare

Accurately compare two versions of a document

Scrub documents of sensitive metadata

Securely share content with other people

Workshare is the leading provider of innovative, intelligent software that lets people compare, protect and share documents on any device, any where.

Used widely by law firms and legal professionals around the world, our solutions empower those who spend their lives working on high stakes documents.

For the case management lifecycle

We have created a two-way integration between Workshare and Tikit Partner for Windows (P4W) to take documents through the case management lifecycle.

Matter files can be shared seamlessly and securely with 3rd parties from P4W through Workshare.

Before they are sent, files are scrubbed clean of any potentially sensitive metadata and an audit history of all sharing activity is maintained – helping you prevent data loss events.

Then, any reviews and document comparisons take place using the most accurate comparison engine on the market. All edits are captured in a redline, with changes shown by category.

Using Workshare you can move from draft to final version confidently and efficiently. And, once your review is complete, sync back the final version to P4W and case closed.

Use Workshare if you want...

- ✓ **Accurate file comparison** – Compare two documents to produce an accurate redline that shows every change by category
- ✓ **Secure file sharing** – Share folders and files securely online with 3rd parties, and sync back new versions to P4W
- ✓ **Fast metadata cleaning** – Clean documents of potentially sensitive metadata and keep an audit history of all sharing

Open your files, not your network.

Workshare's integration with P4W means you can **securely share files** and **sync back new versions** without opening your network and exposing it to vulnerabilities.
