

# Workshare in NetDocuments

## Perform DeltaView comparisons without leaving your NetDocuments environment.

Workshare combines market-leading file comparison and metadata removal technology in one, simple desktop solution. It includes online services that extend collaboration beyond the desktop, giving you the ability to share updated versions efficiently and securely.

### The best in comparison, in NetDocuments

Workshare is the No 1 comparison provider, embedded in NetDocuments. So, if you use NetDocuments, you can now compare files directly within your DMS.

#### **Be fast.**

Find changes quickly and act on them fast to improve the turnaround time of producing a document. Your clients will love you.

#### **Be accurate.**

Remove the risk of missing changes to a document or leaving sensitive content inside a version before it's shared.

### Compare Everywhere

You need to be mobile and agile, so taking two documents into an application to run a comparison isn't the most efficient way anymore. Your comparisons should happen instantly and accurately wherever you are.

Compare Everywhere is embedded into NetDocuments, so you can perform DeltaView comparisons anywhere, on any device without leaving your DMS.

There's no need to waste time opening a separate application. Simply select your files from NetDocuments and compare them to show an accurate redline in seconds.

The best part is, if you're a desktop license holder, Compare Everywhere is free!
