Workshare Compare

Document comparison for the pharma & life sciences industry

Document comparison embedded in tools for the pharma & life sciences industry

Embed the leading comparison engine in your application

Provide 100% accurate document comparison

Support faster reviews on high stakes documents

Empower clients to compare and review their high stakes documents on any device during clinical trials, so they can instantly see what's changed and move onto the next draft.

Workshare Compare Server can be hosted in the cloud or installed on-premise. Then you can create a unique comparison experience for your business and your clients in the pharmaceutical sector.

Embed comparison in your platform to streamline and automate document review. Customize and create your own unique front end, so it's perfect for the clients you support.

Powered by Workshare Compare Server, users can assess the materiality of changes quickly and confidently and manage their document life cycle.

Easy to use

Document authors and reviewers can easily access, review and verify changes as they work together, without having to download or open any additional applications.

Added value

Hosted in the cloud or on-premise, Compare Server is the most flexible way to get file comparison into your application. This means users have the best solution to produce, review and compare their high stakes documents.

Embed Workshare Compare in your software

☑ **A more holistic offering.** Enable clients, who work on high stakes documents, to enjoy a leading comparison feature in your application.

☑ **Flexible file comparison.** Two documents can be compared and an accurate redline produced directly inside your solution.

☑ **Faster review cycles.** Increase client productivity by automating comparison and reducing the average time their review process takes.

☑ **Additional revenue.** Create a new revenue stream for your business by offering rich, new functionality.

☑ **Fast to add value.** Rapidly embed file comparison in your platform to gain competitive advantage and adding value.

Change matters – you're in safe hands

When clients are moving from research and development to drug discovery, from the preclinical phases to clinical trials, from MHRA review to marketing, they will compare hundreds of files.

Give them the best solution available and embed **Workshare Compare Server**.
